## ➤ Outlook & RSS Integration

Users can decide whether to work in the web-based interface or directly within Microsoft Outlook. Thus, emails can be tracked in the system with one click, allowing users to streamline their inboxes while sharing pertinent organizational data. RSS feeds allow users to subscribe to any entity in the system to receive automatic update notifications.

## ➤ SharePoint Dashboards

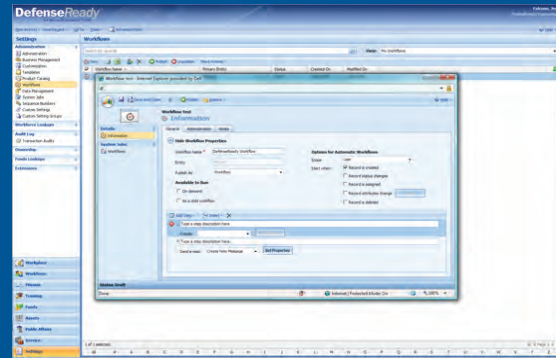

Key information is displayed in dashboards via Microsoft SharePoint, allowing high-level visual access to critical mission-related data. From within SharePoint, users can also search for enterprise data across the entire DefenseReady system.

## ➤ Standard DoD Forms

PART I - ADMINISTRATIVE DATA			
1. NAME (LAST, FIRST, MIDDLE INITIAL)	BRADLEY, ADAM		
2. SSN	123-33-3211		
3. GRADE	CPT

13. GRADE	14. PHOTOBRANCH	15. ORGANIZATION	16. DUTY ASSIGNMENT
LTC	73	Deputy Director, J3	SENIOR RATER'S APO AND EMAIL ADDRESS ( gov or mil)
17. NAME OF REVIEWER (LAST, FIRST, MIDDLE INITIAL)	18. SSN	19. SIGNATURE	20. DATE (YYYYMMDD)
DUNDAS, RICHARD	455-87-5985		

Streamline business processes by automatically generating and populating standard DoD forms for awards, passports, evaluations, and more. DefenseReady fills the forms with the relevant stored data, and adheres to the approved format of the PureEdge/Lotus, or Adobe PDF form.

## ➤ Point & Click Customization

Custom workflows are quickly created using the point-and-click interface, providing an easy way to perform automated tasks. A point-and-click interface generates reports, ad hoc queries, and system and entity customization, allowing users to receive the data they need in the format they require.

## ➤ High-Impact, Ready-To-Use

# Enabling the Business of Defense

Department of Defense (DoD) organizations need innovative business solutions that utilize the latest advances in technology. Partnering with Microsoft, Permuta Technologies optimizes and customizes Microsoft's solution platform for DoD agencies.

Driving modern solutions to defense organizations, Permuta offers *DefenseReady*, a suite of business solutions tailored for DoD agencies. The *DefenseReady* suite is built on the Microsoft Dynamics CRM platform, which is a commercial off-the-shelf platform that provides a foundation for line-of-business applications.

The result is a suite of off-the-shelf solutions that give you the power to respond quickly in a demanding operational environment.

## › Fast and Flexible Solutions

*DefenseReady* is ready to be deployed today in your organization. With *DefenseReady*, agencies can quickly achieve initial operating capability through our QuickStart services. Once the solutions are operating, we tailor the applications to your organization. The result is a total-enterprise solution that meets your operational needs.

## › Focus on Your Mission, Not on Your Business Applications

*DefenseReady*'s commercially-available solutions capitalize on Microsoft's platform technologies, allowing Permuta to provide business applications in a fraction of the time and costs involved with other technologies.

Microsoft's Feature-Rich Platform Technology  
+ Permuta's DoD Domain Expertise

Powerful Business Applications

Microsoft Dynamics™ CRM

# Enterprise-Wide Management

➤ DefenseReady provides DoD agencies with business system modernization by using Microsoft Dynamics CRM as a platform for applications. The applications help agencies manage critical enterprise-wide processes.

## ➤ Single Platform, Multiple Applications

### Workforce

- Consolidated personnel tracking system
- Evaluation and award management

### Staff Actions

- Route, track, and facilitate cross-organizational tasks
- Quickly generate staff actions from Outlook

### Mission

- Flexible foundation for command and control
- Operation and project planning, with KPIs for progress

### Training

- Complete learning management system
- Manage class, web-based, or on-the-job training

### Funds

- Budget and acquisitions management
- Automate workflows for allocating funds

### Assets

- Track assets throughout lifecycle
- Inventory system with simplified ordering

### Service

- Single point of entry for requests and requirements
- Service and case management, plus facility access

### Public Affairs

- FOIA and public inquiry responses
- Metrics to improve future media responses

# Ensuring Mission Success

DefenseReady is intuitive and simple to use. As a result, your personnel save valuable time in their daily work routines. Because they quickly get the information they need, they have more time to analyze mission-critical data. Plus, they are better equipped with the details they need to effectively solve problems, answer questions, and make smarter operational decisions.

## › Office Integration

Tight integration with Microsoft Outlook, Word, and Excel

## › Ad Hoc Queries and Searching

Advanced searches performed easily by users

## › DoD Forms Integration

Automatically populate standard DoD forms in PureEdge or Adobe PDF

## › Reporting and Dashboards

SQL Server Reporting Services, plus dashboards and ad hoc reports

## › Mobile and Offline Access

Access anywhere to DefenseReady data

## › Point-and-Click Workflow

Built-in Windows Workflow Foundation core

## › Service-Oriented Architecture

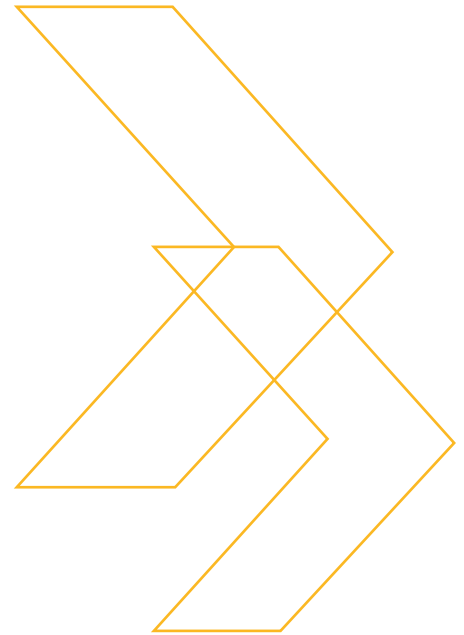

Completely supports web services for application integration

## › Collaboration

Collaborate on missions and tasks via Microsoft SharePoint sites

## › RSS and Notifications

Self-service, automated notifications about changes to records in an RSS feed

› Driving Modern Solutions  
to Defense Organizations

## › Boost Productivity

Full integration with Microsoft Office applications, such as Microsoft Excel, Word, and Outlook, lets your users work in a comfortable environment. With its familiar user interfaces and wizard-based tools, Microsoft Dynamics CRM makes it easier to manage multiple workflows without having to learn new applications.

## › Work from Anywhere

Offline data access and mobility options allow access to data via hand-held devices, such as a BlackBerry or Windows Mobile device, and keeps your users up-to-date, moving the mission forward, even when they are away from their workstations.

## › Improve Security

Role-based security makes it easier to keep your data secure by defining what parts of the software each user can access and use.

## › Provide Accurate Information

Since your data may be stored within multiple and disconnected systems, your staff may see conflicting or incomplete information. Disconnected information makes integrated planning and correct decision-making difficult. Help your staff to be more effective by providing them with a single repository for information.

## › Make Smarter Operational Decisions

The ability to maintain a rich store of historical organizational information, put accurate information at the fingertips of those who need it, and easily run ad hoc queries and reports, means you'll always have the information you need to make informed decisions.
